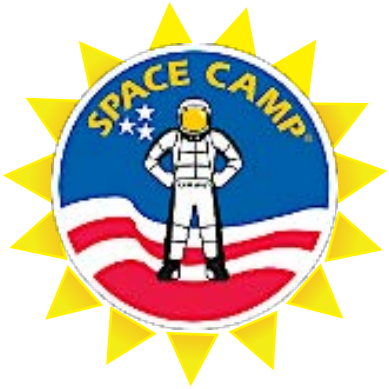
Under the Sea

The under-the-sea theme week will be a whale of a time! We will dive deep into our oceans all around the world and become familiar with the animals & plants that inhabit them. We will also engineer new underwater vehicles in which we can explore the deep sea.



Space Camp

Calling all future astronauts and engineers! Space Camp theme week will have students creating different types of rockets so they can explore our Solar System, learn about distant galaxies, and began the colonization of Mars.

Bugs Life

How much do we really know about the little critters around us everyday? During our bug's life theme week students will get to know insects and the role that they play in our ecosystem and farms. In addition, we will build large scale insect structures as well as visit farms and cook some of the vegetables we bring back!

Roller-coasters & Amusement Parks

Learn more about the super fun amusement parks we all love during our amusement park theme week! Design amazing, unique Roller-coasters of all shapes and sizes, large and small carousels, create your own park mascots all within our very own amusement park!

Planes, Trains, & Automobiles

We sure have a lot of different ways we can get around, and we need people to engineer them all! During our planes, trains, & automobiles week we will focus on mechanics and engineering as well as innovate new vehicles as well as solve traffic jams, clean energy, and long-distance traveling.

Carnival week:

We will end our summer program with a week of festivities! We will have carnival themed activities each day such arcade games, performances, escape room challenges, all which culminate on the last day with a Carnival!
